

In the European CEO International Publication's Best CEO Awards

Zunder founder, Daniel Pérez, named European CEO of the year

- **Daniel Pérez Awarded Best CEO in the Electric Vehicle Industry in 2023**
- **European CEO Recognizes Executives with Outstanding Leadership Abilities Each Year**

Palencia, 19th September 2023: Daniel Pérez, the founder and CEO of Zunder, the leading operator of ultra-fast electric vehicle charging networks in Spain and Southern Europe, has been honored as the CEO of the Year 2023 in the "Electric Vehicle Industry" category by European CEO of the Year. These awards are an international recognition of exceptional business leaders throughout Europe.

This accolade, promoted by the European CEO publication, annually distinguishes the best leaders in various sectors, such as technology, energy, finance, and insurance, among others.

The awardees are selected based on votes from other CEOs and executives of prominent companies worldwide, who assess criteria such as leadership ability, management model, the impact of management on the company's strategy, differentiation from competitors, customer service, and product sophistication.

Regarding the award, Daniel Pérez, the founder and CEO of Zunder, commented: "It is an honor to receive this prestigious recognition as the European CEO of the Year in the Electric Vehicle Industry. This achievement would not have been possible without the effort and dedication of our team, as well as the trust and support of our customers and partners. We will continue to advance in our mission to lead the electric mobility revolution and contribute to a more sustainable world."

[About Zunder](#)

Zunder was founded in 2017 by Daniel Pérez and Lorenzo Antolín in Palencia, Spain. It is the highest-rated independent ultra-fast charging infrastructure operator in its sector by users. In 2023, the company operates more than 235 charging points. Among its

international expansion plans, it has already scheduled the opening of its first ultra- fast charging station in France, followed by Portugal and Italy. By 2025, they expect to operate more than 4,000 charging points and manage 40,000 through their platform, thanks to over €300 million in investments.
