

Zunder Responds to Users with a New Subscription Service

The service improves upon all competitor subscription offers.

- Zunder launches a new monthly subscription service offering smart and cost-effective charging for electric vehicle owners.
- With the Zunder subscription, users will enjoy preferential rates starting from €0.39/kWh, saving from day one and maximizing their investment in electric mobility.
- The subscription will be available starting June 14, 2023, with no penalties or restrictions for cancellation.

Palencia, June 14, 2023 – Zunder, the Spanish ultra-fast charging network operator, has taken a step forward in electric mobility with the launch of its innovative monthly subscription, designed to offer electric vehicle owners smart and cost-effective charging.

Priced at €9.99 per month, the subscription offers users a smart charging experience at reduced rates of €0.39/kWh for charges up to 50kW and €0.45/kWh for charges over 50kW.

With this service, users can save from day one. The Zunder subscription guarantees users preferential prices on all their charges, maximizing their investment in electric mobility.

Additionally, this service offers greater convenience and flexibility as users can charge their electric vehicles anytime and anywhere without worrying about fluctuating costs. Zunder also provides a flexible cancellation policy that adapts to users' needs and circumstances. The process is simple, with no penalties or restrictions, giving users peace of mind with full control over their subscription.

"We are excited to introduce our monthly subscription, allowing electric vehicle owners to save on every charge and enjoy hassle-free sustainable mobility," says Daniel Pérez,

CEO of Zunder. "At Zunder, we strive to drive the adoption of electric mobility and offer efficient and convenient charging solutions. This subscription is another step toward that goal."

The Zunder subscription will be available starting June 14, 2023. To join and access preferential rates, users simply need to select the subscription option on the relevant screen within the app and follow the provided instructions.

About Zunder

Zunder was founded in 2017 by Daniel Pérez and Lorenzo Antolín in Palencia, Spain. It is the highest-rated independent ultra-fast charging infrastructure operator in its sector. By 2023, the company has more than 160 operational charging points. Its international expansion plans include the opening of its first ultra-fast charging station in France, followed by Portugal and Italy. By 2025, they expect to operate over 4,000 charging points and manage 40,000 through their platform, supported by more than €300 million in investment.

Based on a full charge for a car on chargers with a power output greater than 50kW.
